

SUSTAINABLE DEVELOPMENT GOALS

The 17 Sustainable Development Goals (SDGs)

Guided by the principle of "Contributing to Society through Our Business Activities," Aicello integrates compliance into every aspect of its operations—from procurement and sales to product development and plant management—while remaining mindful of its responsibilities to customers, society, and the environment. These efforts contribute to the Sustainable Development Goals (SDGs). Here, we outline how Aicello's business activities relate to each of the 17 SDGs, highlighting both our achievements to date and our priorities for the future.

Explanation of each goal of the SDGs "17 Goals

Icons for each goal

Relevant to SDGs "17 Goals

- Aicello's Approach
- AICELLO's Initiatives
- What Aicello should do in the future

Promoting Sustainable Agriculture and Ensuring Access to Adequate Food for All

2 ZERO HUNGER

We will continue to develop products that help prevent food loss and support agriculture, including sealant films designed to preserve packaged food and water-soluble films for pesticide packaging. We will also remain attentive to whether the raw materials, consumables, and other goods we procure could adversely affect agricultural production.

Ensuring Equal Access to Quality Education for All

4 QUALITY EDUCATION

Aicello offers learning support programs that help employees acquire foreign-language skills and professional qualifications, as well as an internal application program that gives all employees an equal opportunity to apply for and participate in projects. We also take part in educational activities in local communities. Sharing information about the SDGs is another way we promote awareness of Aicello's social responsibility.

Ensuring Safe Water and Sanitation

6 CLEAN WATER AND SANITATION

By reviewing water systems and piping at our plants and promoting water reuse, we have dramatically reduced water consumption. We clearly separate wastewater discharged into rivers from wastewater sent to sewers, and we have measures in place to prevent waste from entering river-bound discharge.

Ending Poverty in All Its Forms, Everywhere

1 NO POVERTY

For more than 90 years, Aicello has conducted business primarily in Japan. We have also established operations in developing countries and grown alongside local communities. Sustaining and expanding our global operations is, in itself, a contribution to achieving this goal.

Ensuring Healthy Lives and Access to Health and Welfare Services for All

3 GOOD HEALTH AND WELL-BEING

Our clean products contribute to pharmaceutical manufacturing and the advancement of medical devices. At our plants, we manage chemical substances appropriately to prevent adverse impacts on society. We will continue to promote health and productivity management, strengthen safety and hygiene awareness through occupational health and safety initiatives, and prioritize the health of our employees and their families.

Eliminating Gender Discrimination

5 GENDER EQUALITY

In recognition of our efforts to promote women's participation and advancement in the workplace, Aicello has been certified by Aichi Prefecture as an "Aichi Women's Brilliance Company." We also continue to prevent harassment and improve the workplace with due consideration for employee health and well-being.

Ensuring Access to Affordable, Reliable, and Modern Energy for All

7 AFFORDABLE AND CLEAN ENERGY

Aicello is actively expanding its use of sustainable energy by installing solar power systems and purchasing electricity from renewable sources. We consider energy efficiency when selecting and introducing equipment, from office devices to production facilities. We will also continue to adopt LED lighting and low-emission vehicles.

Promoting Economic Growth and Decent Work for All

8 DECENT WORK AND ECONOMIC GROWTH

Aicello is advancing smart-factory initiatives to improve productivity. Our efforts to clearly communicate employment conditions, maintain a safe workplace that prevents occupational accidents, operate a fair performance evaluation system, and promote the employment of older persons and people with disabilities all contribute to creating a rewarding and fulfilling workplace.

Reducing Inequality Within and Among Countries

10 REDUCED INEQUALITIES

"Acting as One" is one of Aicello's corporate principles. By recognizing and understanding one another's strengths and working together toward shared goals, employees across the Aicello Group foster mutual respect worldwide. We will continue to improve our fair and impartial performance evaluation system and expand employment opportunities for older persons and people with disabilities.

Ensuring Responsible Production and Consumption

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

We have worked to reduce raw material loss, promote recycling, achieve zero waste emissions, collect and recycle used products, and develop biomass-based products. By continuing to advance our 3R+R initiatives and provide products with assured quality, we will help build a circular economy.

Protecting the Oceans and Marine Resources

14 LIFE BELOW WATER

We clearly separate wastewater discharged into rivers from wastewater sent to sewers. We are implementing and strengthening measures to prevent raw materials and plastic waste from entering rivers, and we actively participate in river cleanups. We will continue to develop products that help protect the oceans, including recyclable clean products, corrosion-inhibiting films, and biodegradable water-soluble films.

Promoting a Safe and Secure Society Governed by the Rule of Law

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

Aicello employees understand that corruption and bribery are prohibited by law and have no place in our business. Our Behavioral Guidelines call for integrity and responsible conduct. We will continue to comply with all applicable laws and regulations and maintain sound, transparent relationships with society.

Driving Innovation for Sustainable Industrial Development

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

We contribute to advances in electronic devices and automobiles through the development of clean products and corrosion-inhibiting films. In our production activities, we proactively adopt the latest technologies, pursue continuous improvements in quality and productivity, and maintain a strong commitment to research and development.

Building Safe, Resilient Communities

11 SUSTAINABLE CITIES AND COMMUNITIES

We take disaster preparedness seriously and maintain robust plans for responding to emergencies. Our efforts to achieve zero waste emissions span more than 30 years. We will continue to help build safe, sustainable communities by managing and reducing chemical substances, preventing pollution, and participating in local environmental improvement activities.

Taking Urgent Action on Climate Change and Its Impacts

13 CLIMATE ACTION

Aicello has reduced carbon dioxide emissions through resource conservation, the use of renewable energy, energy-saving initiatives, more efficient transportation, the transition to low-emission company vehicles, site greening, and the development of bio-based polyethylene products. With a view to contributing through our products as well, we will continue to follow our emissions reduction roadmap through 2030 as we work toward carbon neutrality by 2050. Our business continuity plans for natural disasters also support this goal.

Protecting and Restoring Terrestrial and Forest Ecosystems

15 LIFE ON LAND

We have undertaken a range of initiatives, including using certified raw materials that support forest conservation, reducing paper use, and replacing wooden pallets with alternative materials. We will continue to manufacture products based on green procurement principles and conduct our business with due consideration for the surrounding environment, including local plants and wildlife, when constructing and operating plant buildings and equipment.

Strengthening Partnerships and Cooperation Worldwide

17 PARTNERSHIPS FOR THE GOALS

Aicello Group's Behavioral Guidelines emphasize mutually beneficial relationships with business partners. We build relationships of trust with partners in Japan and overseas, pursue mutual growth, and actively engage in international exchange and collaboration.

Aicello and SDGs
